Abstract

This special issue brings together contributions that draw attention to the historical connections between psychoanalysis and social psychology and that highlight the role that psychoanalytic ideas still have for social psychological practice. It draws attention to the long-standing relationship psychoanalysis has had with social psychology, one that is obscured in most undergraduate textbooks. When the contribution of psychoanalysis to the development of social psychology is noted, it is often but as a curiosity, yet, many of the classical studies in social psychology that were concerned with the application of knowledge in the real world were profoundly influenced by psychoanalysis, and many of the founding figures in the discipline drew upon psychoanalytic ideas. This special issue focuses on how psychoanalysis influenced social psychology and what the consequences are for present-day developments. This introduction sets the basis for the task our contributors address; focusing on the way historical resources can be brought to life and drawing out some implications for the way present-day practice can be elaborated. The task of each contributor will be to help us remember this past relationship so that something new can be done with psychoanalysis in social psychology now. Search Tips

You can use the Boolean operators AND (also + or &), OR and NOT (also -) within search fields. These operators must be entered in UPPERCASE to work.

If more than one term is entered, and no operators are specified, terms are searched using AND. To search for a phrase, put the terms in quotes. For example, *spinal cord* searches spinal AND cord while "spinal cord" finds this exact phrase.

Wildcards

Use a question mark (?) in a search term to represent a single character (*wom?n* finds women or woman). Use an asterisk (*) to represent zero or more characters. For example, *plant** finds all words with that root (plant, plants, & planting) while *an*mia* finds variants with one or more letters (anemia & anaemia). Wildcards CANNOT be used at the start of a search term (*tension) or when searching for phrases in quotes ("tobacco smok*").

Author Search

Author names may appear with full first names or just initials. Place author names in quotes to find a specific name and its variants. For example, "John Smith" finds articles by John Smith, John K Smith and John Colby-Smith while "J Smith" finds articles by J Smith, JR Smith, John Smith and Julie Smith.

Kembali ke *homepage*, gunakan “**Advanced Search**” di bawah *tab search bar*.

Dapat menggabungkan istilah pencarian tanpa harus membuat logika Boolean.

- **Search type** mengacu pada cara melakukan pencarian dapat menggunakan Boolean operators AND (also + or &), OR and NOT (also -)
- **Wildcard** fitur yang memungkinkan penggunaan karakter khusus seperti * atau ?
- **Author Search** adalah pencarian artikel berdasarkan nama penulis

Key words: psychoanalysis; social psychology; history; research; politics

The history of social psychology, particularly in the still-dominant laboratory-experimental tradition, is often treated as an accumulating corpus of knowledge. This means that history is written by the winners, from the standpoint of present-day concerns and in order to legitimate those concerns, and the sequence of names invoked as milestones in the development of the discipline in the standard disciplinary narrative merely mark the imperfect contribution of the dead. It has been remarked of this history that while there are many dead psychologists, some are treated as more dead than others and modern social psychology has, until recently, dispensed with Freud very easily as an example of

About this book

Over the past forty years, media education research has emerged as a historical, epistemological and practical field of study. Shifts in the field—along with radical transformations in media technologies, aesthetic forms, ownership models, and audience participation practices—have driven the application of new concepts and theories across a range of both school and non-school settings. *The Handbook on Media Education Research* is a unique exploration of the complex set of practices, ...
